

Money Problems

To solve money problems involving multiplication and division calculations.

1) Calculate the cost of the following items. The first one has been done for you as an example.

a) **3 teddies**

Separate the pounds and pence, then multiply:

$$£5 \times 3 = £15$$

$$50p \times 3 = 150p = £1 \text{ and } 50p$$

Now add together the pounds and the pence:

$$£15 + £1 + 50p = £16.50$$

Total = £16.50

b) **2 yachts**

Separate the pounds and pence, then multiply:

Now add together the pounds and the pence:

Total =

c) **4 books**

Separate the pounds and pence, then multiply:

Now add together the pounds and the pence:

Total =

d) **2 teddies**

Separate the pounds and pence, then multiply:

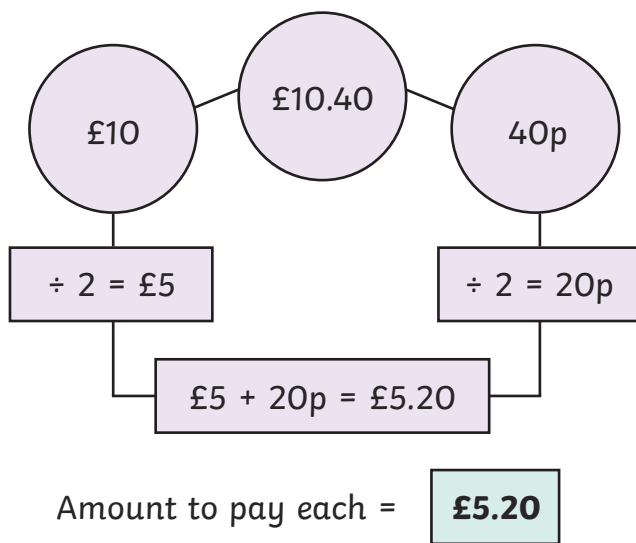

Now add together the pounds and the pence:

Total =

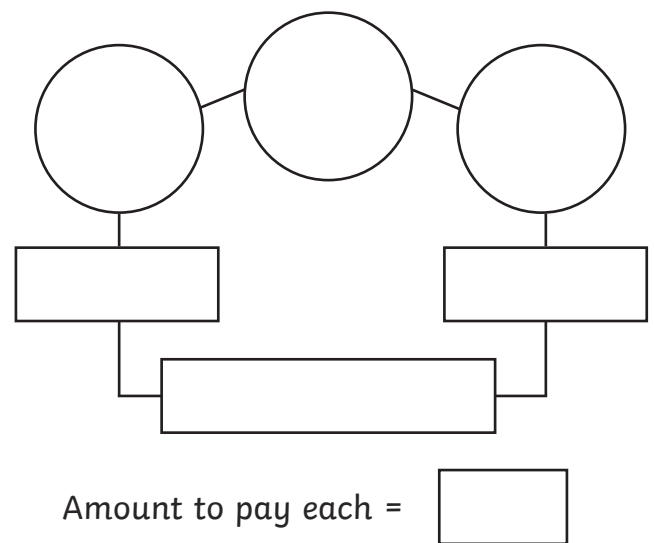

2) Answer these problems. The first one has been done for you as an example.

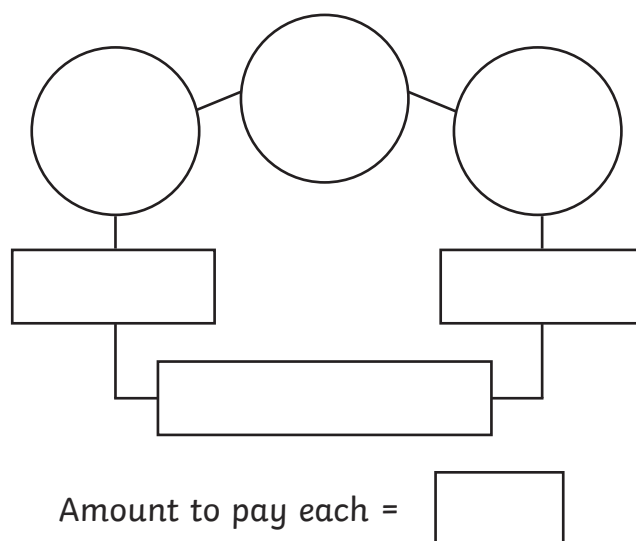

- a) 2 friends buy a vase for their teacher. They share the cost equally. How much should they each pay?

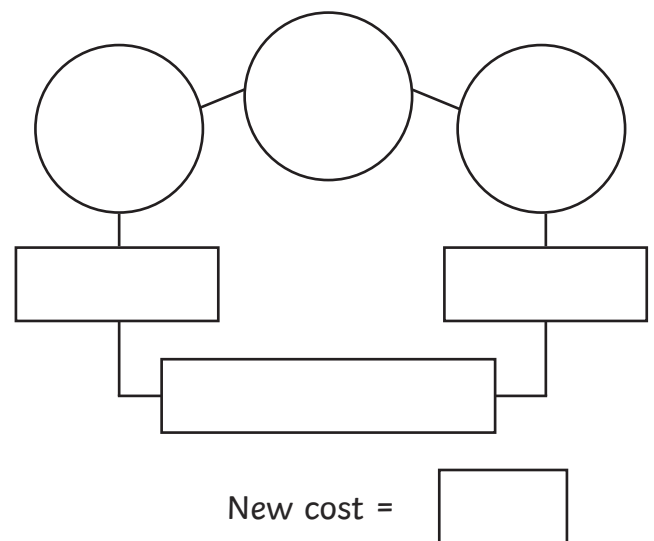

- b) Jed, Lucy and Dan buy a necklace for their gran. They share the cost equally. How much should they each pay?

- c) 4 friends buy a clock for their teacher. They share the cost equally. How much should they each pay?

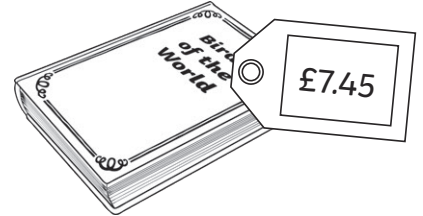

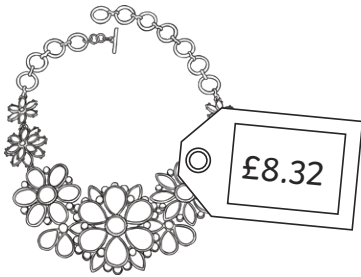

- d) A clock is reduced by a half. What is the new cost?

Money Problems

To solve money problems involving multiplication and division calculations.

1) Calculate the cost of the items. Show how you worked out the answers.

Separate the pounds and pence, then multiply each.

Add together the pounds and the pence:

a) 2 necklaces

a) 3 bags

2) Use $<$ $>$ or $=$ to compare these items:

5 books

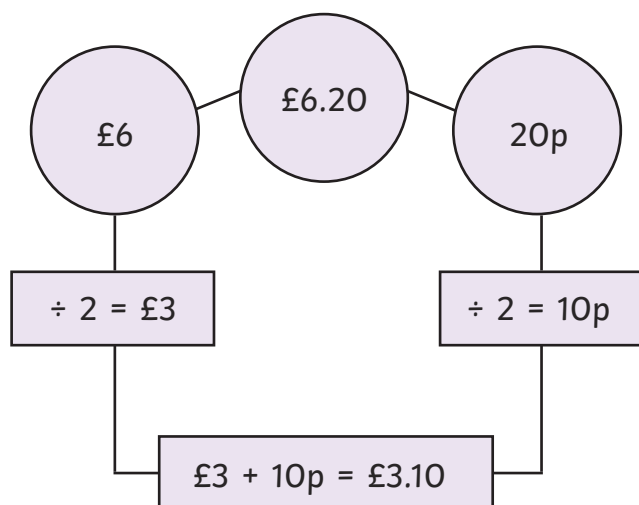

4 necklaces

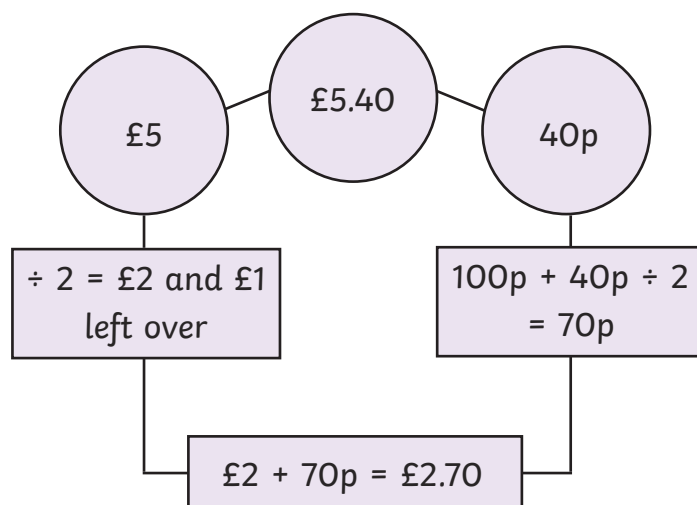

3) Answer these questions. Use a part-whole model to help. Examples are given for you to follow.

$$£6.20 \div 2 =$$

$$£5.40 \div 2 =$$

a) **Gina and Jo buy a vase for their granny. They share the cost equally. How much should they each pay?**

Amount to pay each =

b) **3 friends buy a necklace for their teacher. They share the cost equally. How much should they each pay?**

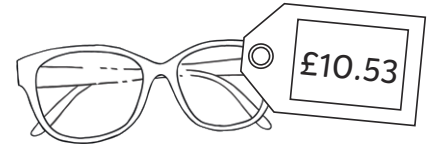

Amount to pay each =

c) **Sue, Ted and Kate buy a clock for their dad. They share the cost equally. How much should they each pay?**

Amount to pay each =

Money Problems

To solve money problems involving multiplication and division calculations.

- 1) Several items have been bought and these are the receipts. Each receipt has several of one particular item. Work out the item and how many were bought. One has been completed. Show how you worked out the answer.

Receipt 1

Total = £21.06

$$£10.53 \times 2$$

$$£10 \times 2 = £20$$

$$53p \times 2 = 106p = £1.06$$

$$£20 + £1.06 = £21.06$$

2 pairs of sunglasses

Receipt 2

Total = £32.40

Receipt 3

Total = £22.86

Receipt 4

Total = £42.12

2) Here is a receipt:

2 necklaces.....	£31.50
3 vases.....	£24.69
5 candles.....	£11.50

Work out the cost of one of each item. Show how you worked out the answer:

a) Cost of 1 necklace =

b) Cost of 1 vase =

c) Cost of 1 candle =

Money Problems **Answers**

1)

a) **3 teddies**

b) **2 yachts**

Separate the pounds and pence, then multiply:

$$\text{£}6 \times 2 = \text{£}12$$

$$25\text{p} \times 2 = 50\text{p}$$

Now add together the pounds and the pence:

$$\text{£}12 + 50\text{p} = \text{£}12.50$$

Total = **£12.50**

c) **4 books**

Separate the pounds and pence, then multiply:

$$\text{£}7 \times 4 = \text{£}28$$

$$30\text{p} \times 4 = 120\text{p} = \text{£}1.20$$

Now add together the pounds and the pence:

$$\text{£}28 + \text{£}1.20 = \text{£}29.20$$

Total = **£29.20**

d) **2 teddies**

Separate the pounds and pence, then multiply:

$$\text{£}5 \times 2 = \text{£}10$$

$$50\text{p} \times 2 = 100\text{p} = \text{£}1$$

Now add together the pounds and the pence:

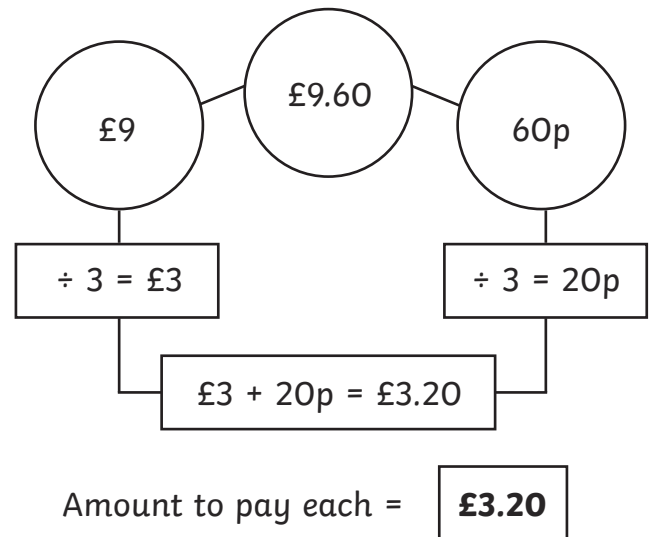

$$\text{£}10 + \text{£}1 = \text{£}11$$

Total = **£11**

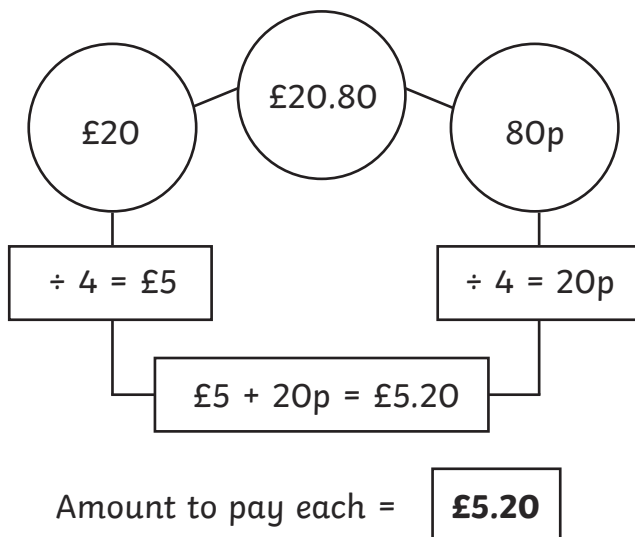

2)

a)

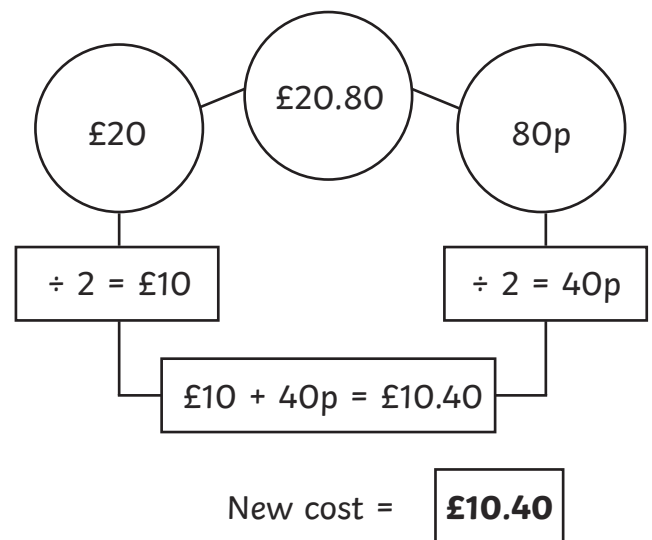

b) **Jed, Lucy and Dan buy a necklace for their gran. They share the cost equally. How much should they each pay?**

c) **4 friends buy a clock for their teacher. They share the cost equally. How much should they each pay?**

d) **A clock is reduced by a half. What is the new cost?**

Money Problems **Answers**

1)

a) **£16.64**

b) **£30.87**

2)

£37.25 **>** **£33.28**

3)

a) **£6.12**

b) **£4.50**

c) **£8.60**

Money Problems **Answers**

1)

Receipt 2 5 pairs shorts

Receipt 3 3 T shirts

Receipt 4 4 pairs sunglasses

2)

a) **£15.75**

b) **£8.23**

c) **£2.30**
