9. How much would it cost to buy one of each main item with no toppings?

10. Matteo has £2.50. Can you think of 3 different options for things he could buy?

Answers

1. Rufus wants to buy a ruler and a pencil. How much money will he need?

$$33\text{p} + 22\text{p} = 55\text{p}$$

2. Jamal visited the shop with 48p. He bought a pen. How much money did Jamal have left over?

$$48\text{p} - 25\text{p} = 23\text{p}$$

3. Isla isn't sure if she should buy a pencil and a sharpener, or a ruler. Which would be the cheapest to buy?

$$\text{pencil} + \text{sharpener} = 22\text{p} + 12\text{p} = 34\text{p}$$

$$\text{ruler} = 33\text{p}$$

It would be cheaper to buy a ruler.

4. Mariah bought a ruler, a pen and an eraser. "I spent less than 70p," she says. Is she correct?

$$33\text{p} + 25\text{p} + 15\text{p} = 73\text{p}$$

Mariah is not correct – she spent more than 70p.

5. Josey spent 48p in the shop on two items. What did she buy?

$$33\text{p} + 15\text{p} = 48\text{p}$$

Josey bought a ruler and an eraser.

6. Gregor bought two pencils, a sharpener and a pen. How much did Gregor spend?

$$22\text{p} + 22\text{p} + 12\text{p} + 25\text{p} = 81\text{p}$$

7. Mohsen took 60p to the shop. He bought an eraser, a sharpener and a pencil. How much money does Mohsen have left over?

$$15\text{p} + 12\text{p} + 22\text{p} = 49\text{p}$$

$$60\text{p} - 49\text{p} = 11\text{p}$$

Mohsen has 11p left over.

8. How much would it cost to buy one of each item in the shop?

$$22p + 25p + 15p + 33p + 12p = 107p \text{ or } \text{£}1 \text{ and } 7p$$

9. McKenna has 50p to spend. What three different items could she buy?

$$22p + 15p + 12p = 49p$$

McKenna could buy a pencil, an eraser and a sharpener.

10. Chen bought a pen, two sharpeners and a ruler. Harold bought three pencils and an eraser. Who spent the most money?

$$\text{Chen: } 25p + 12p + 12p + 33p = 82p$$

$$\text{Harold: } 22p + 22p + 22p + 15p = 81p$$

Chen spent the most money.

The Lakeside Cafe

1. Ruben orders a sandwich, a carton of juice and a cookie. How much money does he need?

$$£3 + £1 + £2 = £6$$

2. Rosie brought £10 to the cafe. She bought pasta. How much money does Rosie have left over?

$$£10 - £5 = £5$$

Rosie has £5 left over.

3. Aaron has brought £8 to the cafe. He wants to buy soup, a hot chocolate and a muffin. Does he have enough money?

$$£4 + £1 + £3 = £8$$

Yes, Aaron has exactly the right amount of money.

4. Mrs Smyth orders four hot chocolates and four cookies for the teachers. "It cost exactly £11," she says. Is she correct?

$$\text{Four hot chocolates} = £1 + £1 + £1 + £1 = £4$$

$$\text{Four cookies} = £2 + £2 + £2 + £2 = £8$$

$$£4 + £8 = £12$$

No, Mrs Smyth is not correct.

5. Pippa spent £9 in the cafe on three different items. What three items could she have bought?

Various answers, for example:

sandwich, hot chocolate and pasta

sandwich, juice and pasta

soup, cookie and muffin

pasta, muffin and hot chocolate

pasta, muffin and juice

6. Amari orders for his table. They are having fish and chips, pasta, two hot chocolates and a muffin. He has £24. How much money will he have left over?

$$£9 + £5 + £1 + £1 + £3 = £19$$

$$£24 - £19 = £5$$

7. Ryan buys soup, a sandwich and some juice. His sister Rachel buys curry and a hot chocolate. Who spent the most money?

$$\text{Ryan: } £4 + £3 + £1 = £8$$

$$\text{Rachel: } £8 + £1 = £9$$

Rachel spent the most money.

8. How much would it cost to buy one of each item in the cafe?

$$£3 + £1 + £1 + £4 + £5 + £9 + £8 + £2 + £3 = £36$$

9. Teddy has £7 to spend in the cafe. What could he buy?

Various answers, including:

sandwich and soup

pasta and a cookie

sandwich, muffin and hot chocolate

10. Mrs Wilde bought curry, a carton of juice and a muffin. Mr Simms bought fish and chips, a hot chocolate and a cookie. Who spent the most money?

$$\text{Mrs Wilde: } £8 + £1 + £3 = £12$$

$$\text{Mr Simms: } £9 + £1 + £2 = £12$$

They spent the same amount of money.

The Game Shop

1. Xu buys Speed Racer and 101 Top Puzzles. How much does Xu spend?

$$£15 + £8 = £23$$

2. Maryam has £55. She wants to buy a Pocket Game Pro and Speed Racer. Does she have enough money?

$$£42 + £15 = £57 \text{ No, Maryam does not have enough money.}$$

3. Cooper buys Football Star, Outer Space Adventures and a controller. How much does he spend?

$$£24 + £18 + £5 = £47$$

4. Nani brought £70 to the game shop. She bought a Pocket Game Pro and a copy of Football Star. How much money does she have left over?

$$£42 + £24 = £66$$

$$£70 - £66 = £4$$

Nani has £4 left over.

5. Rahim buys two items from the shop. "My two items cost exactly £26," Rahim says. What two items did he buy?

Outer Space Adventures and 101 Top Puzzles

6. Mr Spring is shopping for his son. "It would be cheaper to buy him a Pocket Game Pro and all four games than it would to buy him a Gamebox and Football Star!" Mr Spring says. Is he correct?

$$£42 + £15 + £24 + £18 + £8 = £107$$

$$£75 + £24 = £99$$

No, Mr Spring is not correct.

7. The game shop also sells second-hand consoles. Arya buys a second-hand Gamebox for £58. How much money did she save over buying a brand new Gamebox?

$$£75 - £58 = £17$$

- a. How much would it cost to buy one of each game in the shop?

$$£15 + £24 + £18 + £8 = £65$$

- b. How much would it cost to buy one of each console and a controller?

$$£75 + £42 + £5 = £122$$

8. Rory wants to buy a console and a game, but he is trying to spend sensibly. What is the cheapest combination he could buy?

Pocket Game Pro and 101 Top Puzzles

9. Gilbert buys a Pocket Game Pro with Football Star and Speed Racer. Selena buys a Gamebox with a spare controller and a copy of 101 Top Puzzles. Who spent the most money?

$$\text{Gilbert: } £42 + £24 + £15 = £81$$

$$\text{Selena: } £75 + £5 + £8 = £88$$

Selena spent the most money.

The Ice Cream Van

1. Nyall buys a double cone and an ice lolly. How much does he spend?

$$£2.50 + £1.22 = £3.72$$

2. Freya has £4.00. She wants to buy a single cone with sprinkles, chocolate sauce and a wafer. Does she have enough money?

$$£1.75 + £0.45 + £1.10 + £0.99 = £4.29$$

No, she doesn't have enough money.

3. Joshua buys a tub of ice cream with strawberry sauce and sprinkles. How much does he spend?

$$£2.36 + £0.75 + £0.45 = £3.56$$

4. Francine brought a £5.00 note to the ice cream van. She bought a single cone with chocolate sauce and a wafer. How much change does she get?

$$£1.75 + £1.10 + £0.99 = £3.84$$

$$£5.00 - £3.84 = £1.16$$

5. Mr Hurst is buying ice creams for the teachers. "It would be cheaper to get everyone a single cone with strawberry sauce than to get them a double cone." Is he correct?

$$£1.75 + £0.75 = £2.50$$

He's not correct. They are both the same price.

6. Miss Cook buys two items from the ice cream van. She paid with £3.00 and her change was £0.05. What did she buy?

$£3.00 - £0.05 = £2.95$ Miss Cook bought a double cone (£2.50) with sprinkles (£0.45).

7. Dalal buys a milkshake and an ice lolly. Zaina buys a double cone and a tub. Who spent the most?

Dalal: $\pounds 3.69 + \pounds 1.22 = \pounds 4.91$

Zaina: $\pounds 2.50 + \pounds 2.36 = \pounds 4.86$

Dalal spent the most.

8. How much would it cost to buy a single cone with all the toppings?

$\pounds 1.75 + \pounds 0.75 + \pounds 1.10 + \pounds 0.45 + \pounds 0.99 = \pounds 5.04$

9. How much would it cost to buy one of each main item with no toppings?

$\pounds 1.75 + \pounds 2.50 + \pounds 2.36 + \pounds 1.22 + \pounds 3.69 = \pounds 11.52$

10. Matteo has $\pounds 2.50$. Can you think of 3 different options for things he could buy?

Multiple options, including:

single cone ($\pounds 1.75$) + strawberry sauce ($\pounds 0.75$)

single cone ($\pounds 1.75$) + sprinkles ($\pounds 0.45$)

double cone ($\pounds 2.50$)

tub ($\pounds 2.36$)

ice lolly ($\pounds 1.22$) + wafer ($\pounds 0.99$)
