What is this resource and how do I use it?

Use these challenge cards to give your child some practice in interpreting data using line graphs, tables, pie charts and timetables. They're a great way to offer some revision in the run-up to the KS2 SATs without being overwhelming. Your child will need to look closely at the data to answer the questions and use their reasoning skills to explain.

What skills does this practise?

Pie Charts

Reasoning

Interpreting Data

Line Graphs

Further Activity Ideas and Suggestions

Visit [this page](#) to find more maths resources for your year 6 child. Give them some [times tables practice](#) or get them working on [place value](#) or [number sequences](#). Why not download our week of workouts for [arithmetic](#) and [reasoning](#) for some bite-size SATs practice? Find more SATs resources [here](#).

Statistics: Statistics Challenges

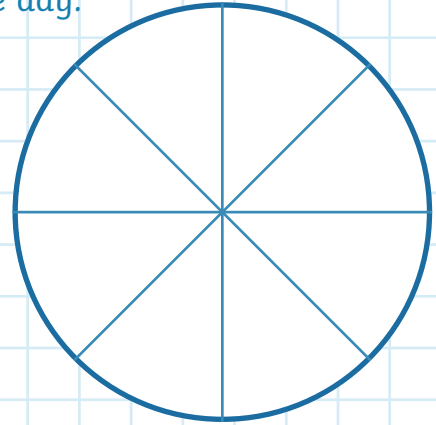

Favourite Times of Day

64 adults were asked to name their favourite time of the day.

Time of Day	Votes
7 a.m. - 12 p.m.	8
12 p.m. - 5 p.m.	16
5 p.m. - 10 p.m.	16
10 p.m. - 7 a.m.	24

Key

- ☐ 7 a.m. - 12 p.m.
- ☐ 12 p.m. - 5 p.m.
- ☐ 5 p.m. - 10 p.m.
- ☐ 10 p.m. - 7 a.m.

1. Complete the pie chart using the data and fill in the key.

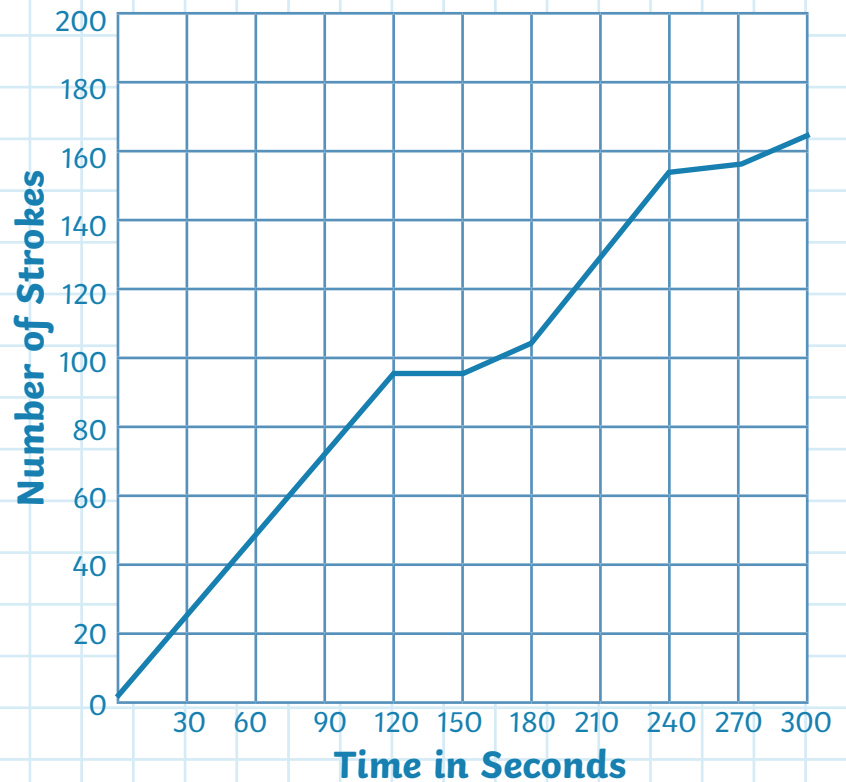

2. Work out the percentages of adults voting for each time period.

Time of Day	Percentage
7 a.m. - 12 p.m.	
12 p.m. - 5 p.m.	
5 p.m. - 10 p.m.	
10 p.m. - 7 a.m.	

Swim Strokes

Hamish went swimming. This line graph shows how many strokes he took during his swim.

1. Estimate how many strokes Hamish swam in the first 90 seconds.
2. What do you think happened between 120 and 150 seconds?
3. Henry says, "I used fewer strokes in the second half of the swim than in the first half." Why do you think this is?

Daily Dinners at School

This table shows the number of children having a school lunch or packed lunch during the week.

1. Complete the data in the table.
2. Faris says, "In my class, school lunches are more popular than packed lunches." Which class is Faris in?

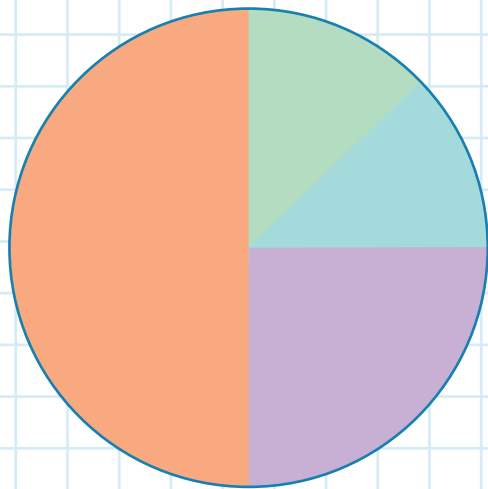

Class	School Lunch	Packed Lunch	Total
1	14	15	
2	15		31
3		10	28
4	13		29
5	16	16	
6	13		
Total			176

3. For every 26 school lunches cooked, a member of kitchen staff is employed. How many kitchen staff are required for the school?

twinkl.com

Lolly Flavours

The pie chart shows the most popular lolly flavours in a shop according to the sales.

Key

- ☐ licky splits
- ☐ apple dippers
- ☐ cherry pops
- ☐ berry chews

1. Complete the key using this information:

25% of sales were for cherry pops.

50% of sales were for licky splits.

The rest of the sales were equally split between apple dippers and berry chews.

2. Why couldn't the pie chart represent 50 lollies altogether?

Shadow Length

Henry measures the length of the shadow of a pot over the course of a day. Here are his measurements:

Time	09:00	10:00	11:00	12:00	13:00	14:00	15:00	16:00	17:00	18:00
Length of Shadow in cm	50	30	15	10	10	30	40	50	65	75

- Construct a line graph to show the information for the table.
- What do you think is happening between 12 p.m. and 1 p.m.?

Catching the Bus

Here is a bus timetable:

	Bus 1	Bus 2	Bus 3	Bus 4	Bus 5	Bus 6
Town Centre	07:55	08:25	08:55	09:25	09:55	10:25
High School	08:04	08:35	09:07	09:35	10:05	10:34
Park	08:15	08:47	09:20	09:47	10:16	10:46
Gym	08:28	09:00	09:35	10:00	10:29	10:59
Cinema	08:35	09:10	09:44	10:08	10:36	11:06

1. How long does bus 3 take to get from the high school to the cinema?
2. Caleb lives in the town centre. He needs to be at school by 9:00. Which bus should he take and how long will he have to wait until school starts?
3. Which bus travels the slowest between the park and the cinema?

Statistics: Statistics Challenges Answers

Favourite Times of Day

1.

2. Work out the percentages of adults voting for each time period.

Time of Day	Percentage
7 a.m. - 12 p.m.	12.5%
12 p.m. - 5 p.m.	25%
5 p.m. - 10 p.m.	25%
10 p.m. - 7 a.m.	37.5%

Swim Strokes

1. Estimate how many strokes Hamish swam in the first 90 seconds.

67 (between 65 and 70)

2. What do you think happened between 120 and 150 seconds?

He stopped swimming so maybe he had a rest or floated during this time.

3. Henry says, "I used fewer strokes in the second half of the swim than in the first half."

Why do you think this is?

He might have been getting tired from swimming, therefore the amount of strokes decreased.

Daily Dinners at School

1.

Class	School Lunch	Packed Lunch	Total
1	14	15	29
2	15	16	31
3	18	10	28
4	13	16	29
5	16	16	32
6	13	14	27
Total	89	87	176

2. Faris says, "In my class, school lunches are more popular than packed lunches."

Which class is Faris in?

class 3

3. For every 26 school lunches cooked, a member of kitchen staff is employed. How many kitchen staff are required for the school?

4 staff members

Lolly Flavours

1.

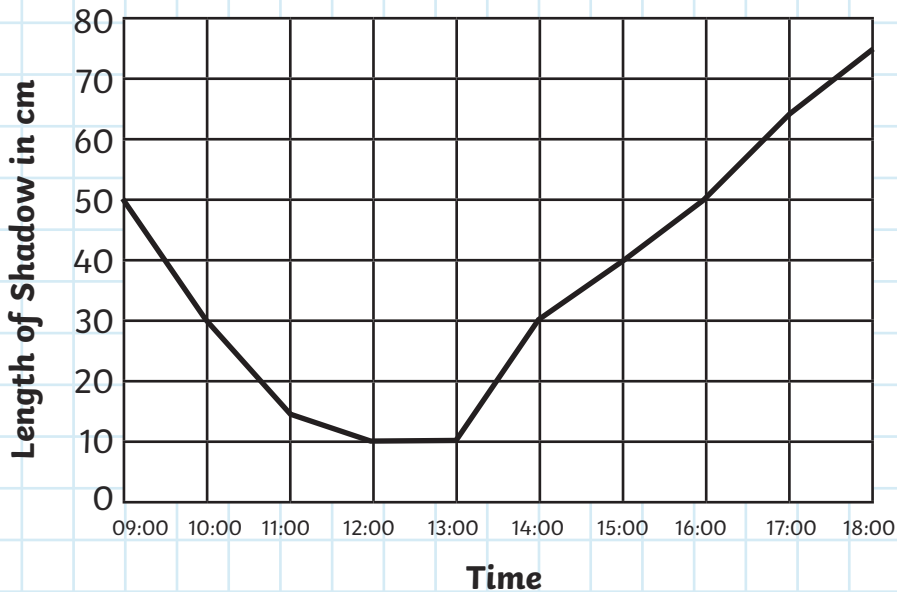

Key	
	licky splits
	apple dippers
	cherry pops
	berry chews

2. Why couldn't the pie chart represent 50 lollies altogether?

It couldn't represent 100 lollies because the apple dippers section and the berry chews section would represent 12.5 lollies sold and you can't sell half of a lolly.

Shadow Length

1. A Line Graph to Show the Length of a Shadow over the Course of a Day

2. What do you think is happening between 12 p.m. and 1 p.m.?

The sun is directly overhead during this time and so the shadow is at its shortest.

Catching the Bus

1. How long does bus 3 take to get from the high school to the cinema?

37 minutes

2. Caleb lives in the town centre. He needs to be at school by 9:00. Which bus should he take and how long will he have to wait until school starts?

He would need to take bus 2, which leaves the town centre at 08:25 and gets to the high school at 08:35. This would mean he has to wait 25 minutes until school starts at 09:00.

3. Which bus travels the slowest between the park and the cinema?

bus 3 (24 minutes)
