

Interpreting Pie Charts with Percentages

A year group of 40 children voted for their favourite meal of the day.

A Pie Chart to Show Favourite Meals of the Day

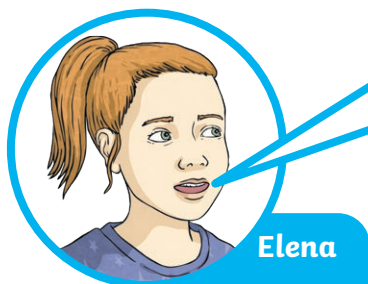

1) Label the pie chart with the missing percentages of children who chose each meal of the day.

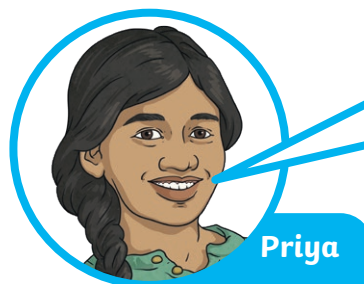

2) How many children voted for each meal?

a) breakfast b) lunch c) dinner

3) Priya and Elena are working out how many children chose brunch. Who do you agree with? Explain your reasoning.

5% of children chose brunch so that means 5 children chose brunch.

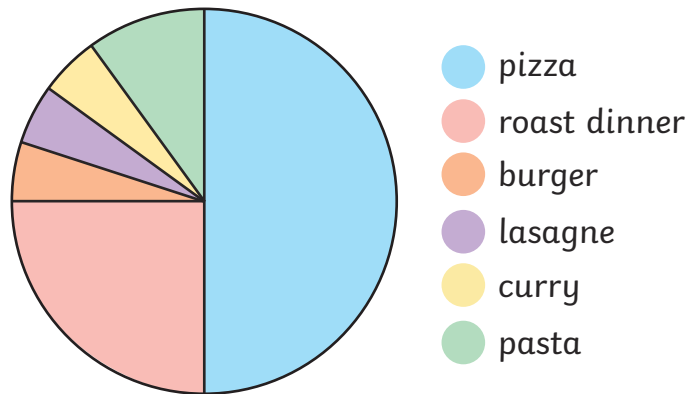

I think 4 children chose brunch as their favourite meal of the day.

Interpreting Pie Charts with Percentages

200 children voted for their favourite dinner.

1) What percentage of children chose each dinner?

a) pizza		b) roast dinner		c) burger	
d) lasagne		e) pasta		f) curry	

2) How many children voted for each of these dinners?

a) pizza		b) roast dinner	
----------	----------------------	-----------------	----------------------

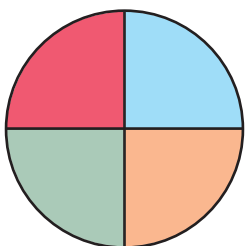

3) Altogether, how many children voted for either lasagne, curry, burger or pasta?

4) Zeke asked some people in the park and in the supermarket what eye colour they have.
Do you agree with Zeke's statement? Explain your answer.

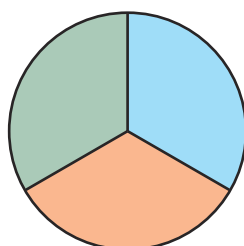

Pie Charts to Show Eye Colour

park

supermarket

There were more people who had green eyes in the supermarket than in the park because the section for 'green' is bigger.

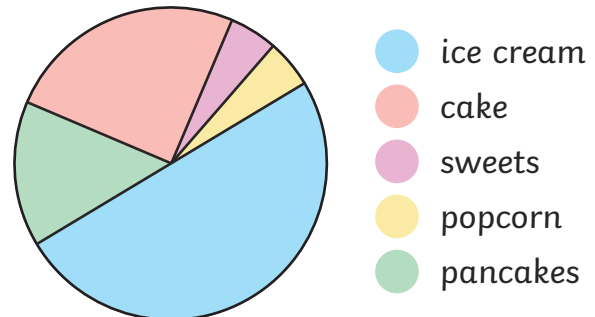

Interpreting Pie Charts with Percentages

Children at the theatre on Saturday were asked what their favourite sweet snack was.

- 1) If 55 children voted for a cake as their favourite sweet snack, how many children were asked in total?

15%

A Pie Chart of Favourite Sweet Snacks

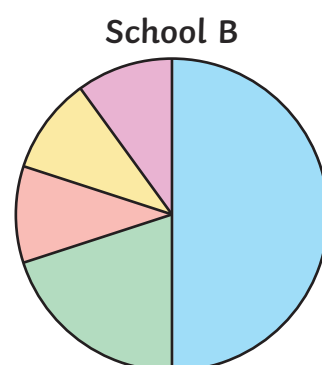

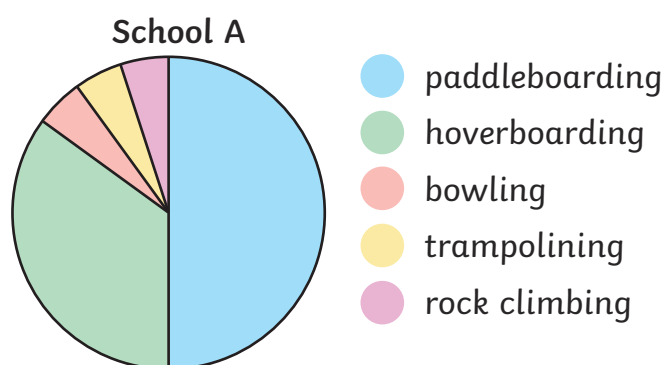

- 2) Complete the table with the percentage and number of children for each snack.

Sweet Snack	Percentage of Children	Number of Children
ice cream		
sweets		
popcorn		
pancakes		

- 3) Year 6 children in two schools voted for their favourite end-of-term reward. In school A, there are 200 children in year 6. In school B, there are 100 children in year 6.

Pie Charts to Show Year 6 Children's Favourite End-of-Term Reward

Is Emily correct? Explain your answer.

Emily

The same number of children in both schools voted for paddleboarding.
