What is this resource and how do I use it?

This activity will guide your child through what a shape net is and what each shape's most common net looks like. Included is a card game that your child can play to practise matching shape nets plus a colourful net-matching challenge.

What skills does this practise?

3D Shapes

Nets

Properties of 3D Shapes

Further Activity Ideas and Suggestions

Your child can practise identifying 3D shapes with these handy [word mats](#), dig deeper into the properties of 3D shapes with these [colourful posters](#) or play a fun [matching game](#) all about 3D shapes.

What is a Shape Net?

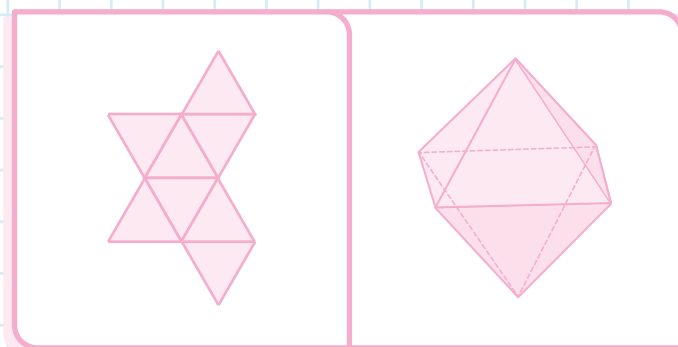

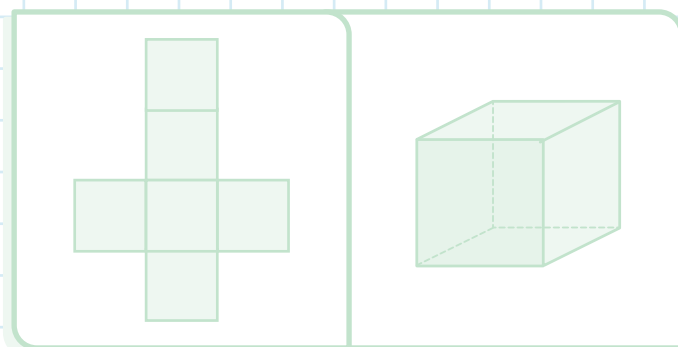

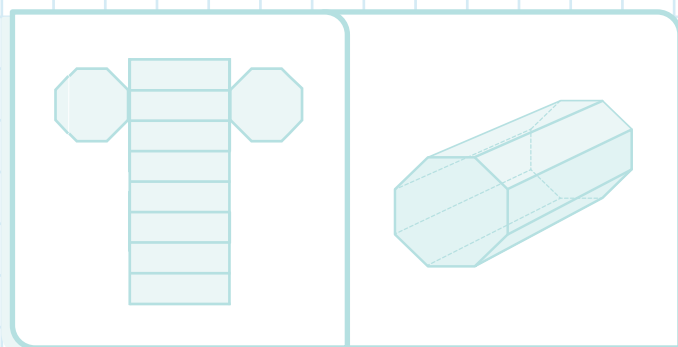

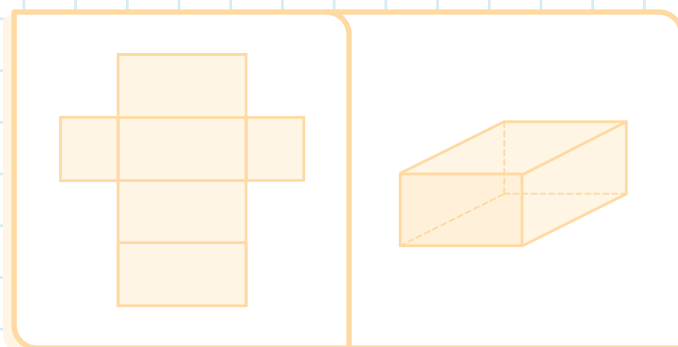

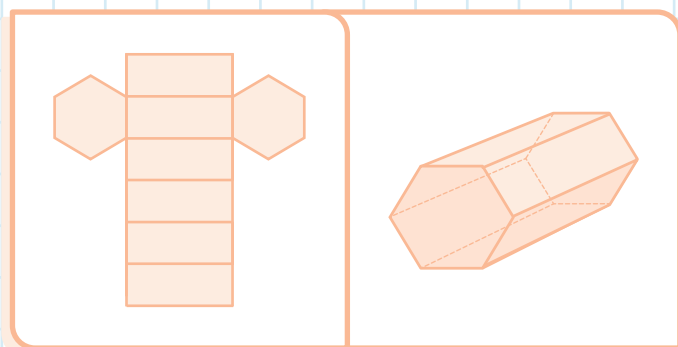

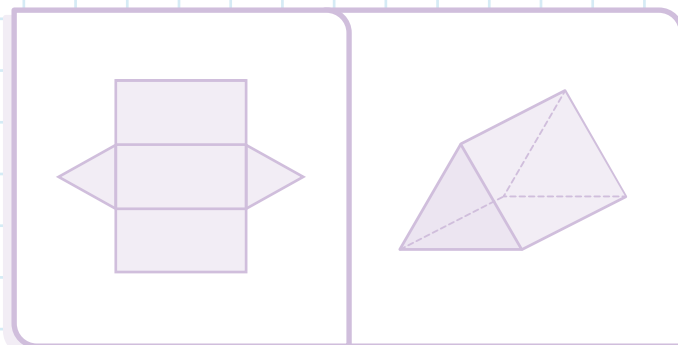

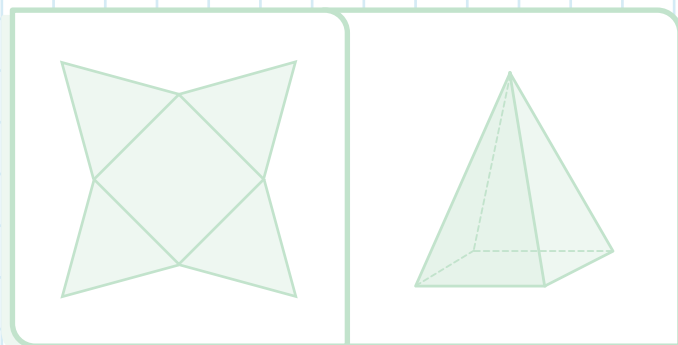

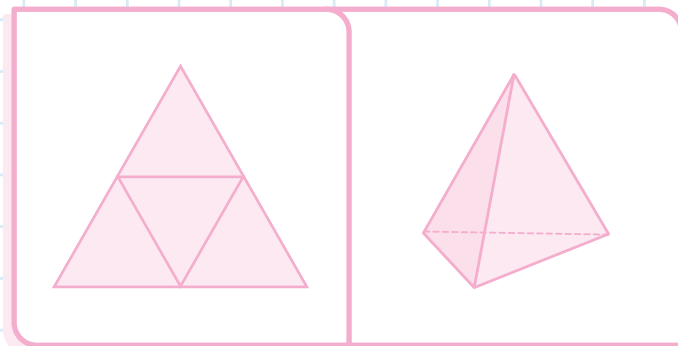

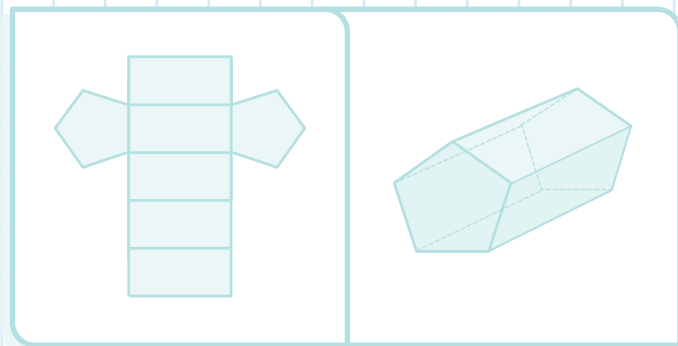

A net is a 2D representation of a 3D shape. It shows what a 3D shape would look like if laid out flat.

Nets are useful for showing which 2D shapes make up a 3D shape. Below is a square-based pyramid represented both as a net and as a 3D shape.

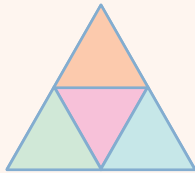

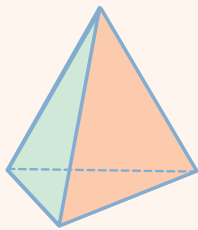

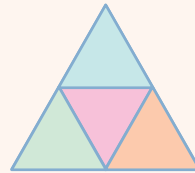

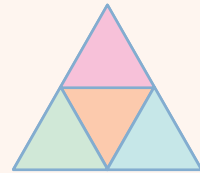

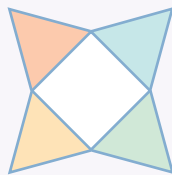

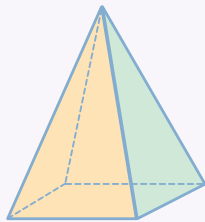

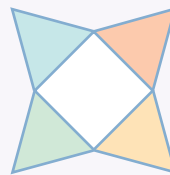

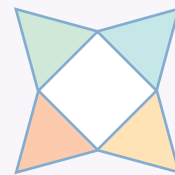

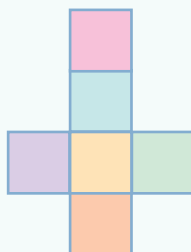

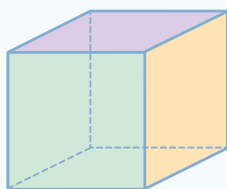

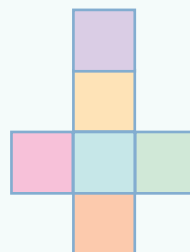

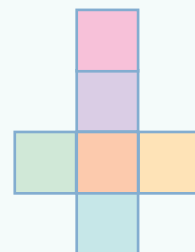

We can easily see that a square-based pyramid is made up of 1 square face and 4 triangular faces.

Common Shape Nets

Which net?

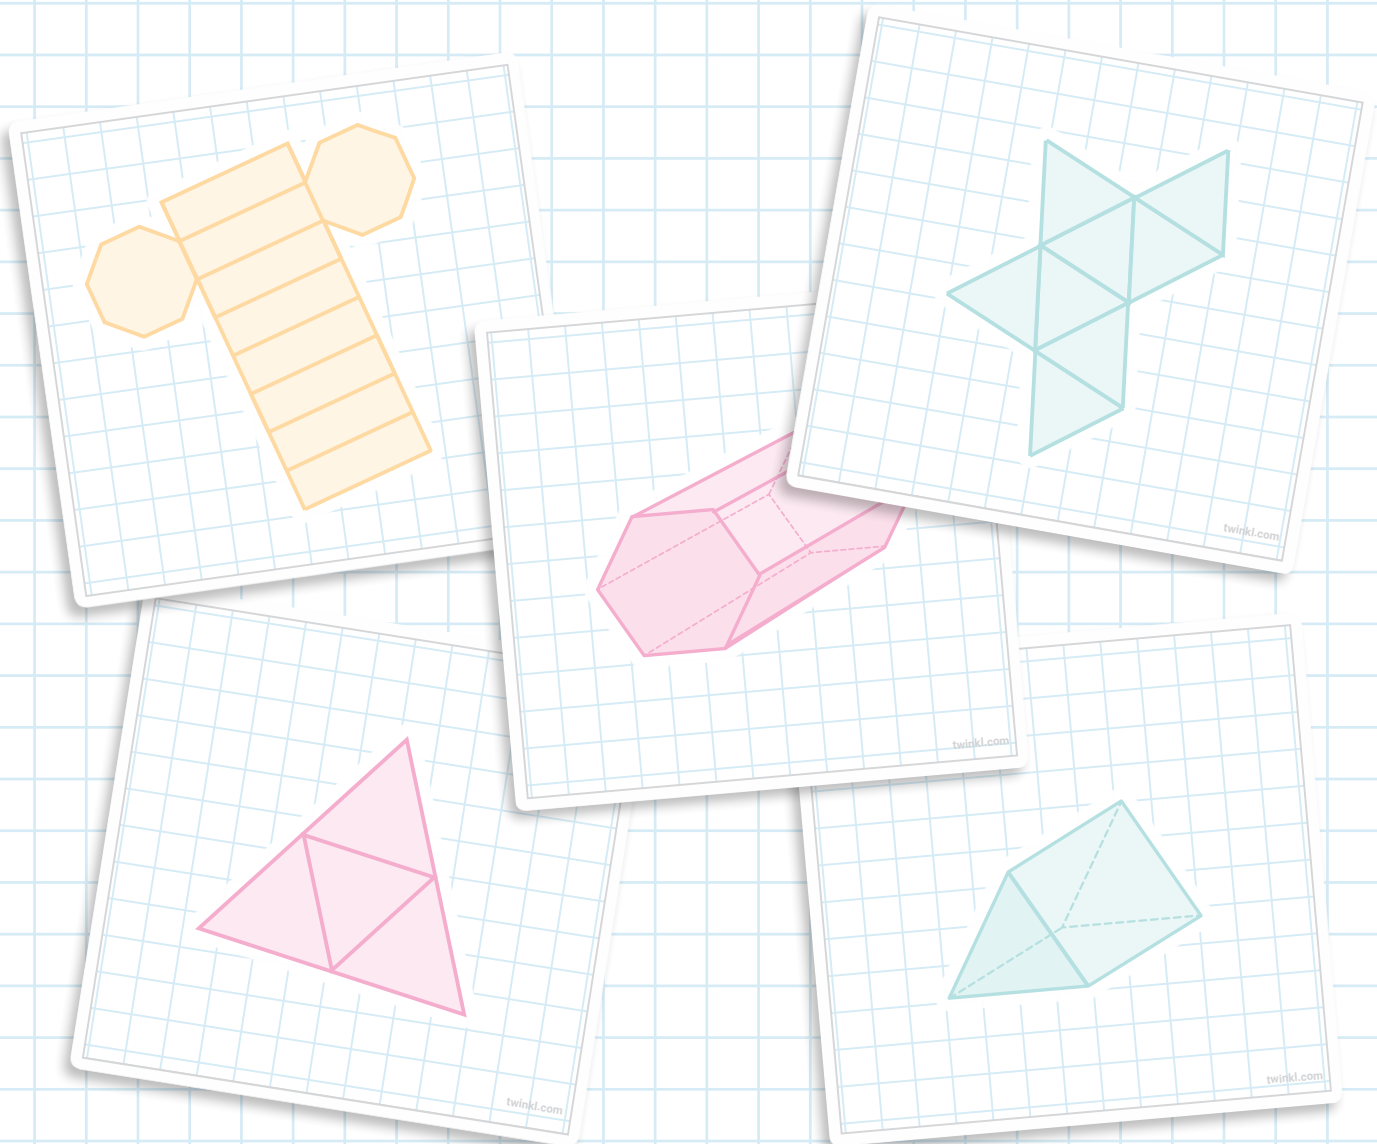

Look closely at each 3D shape and tick the net that matches it.

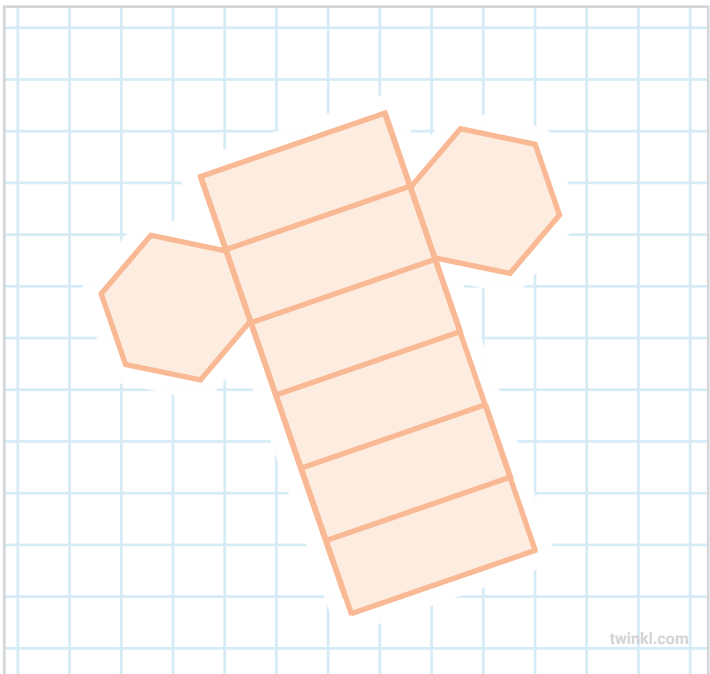

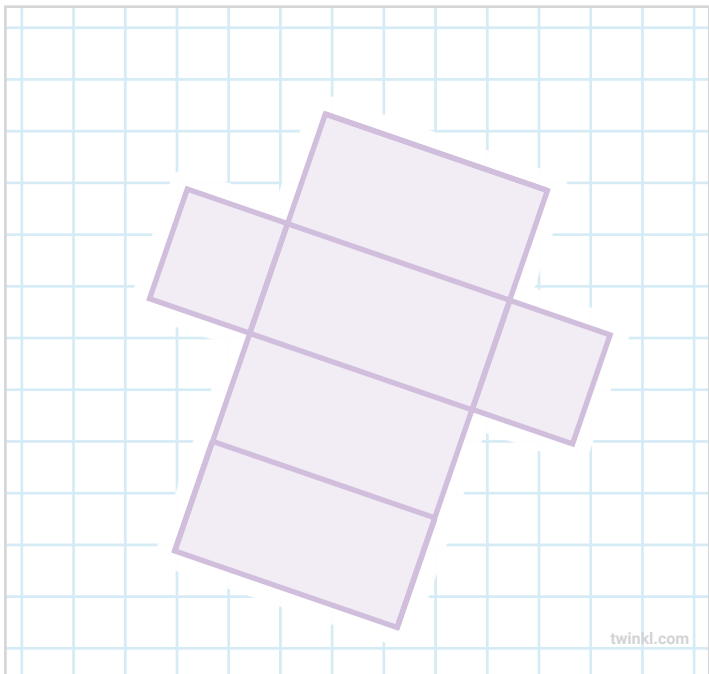

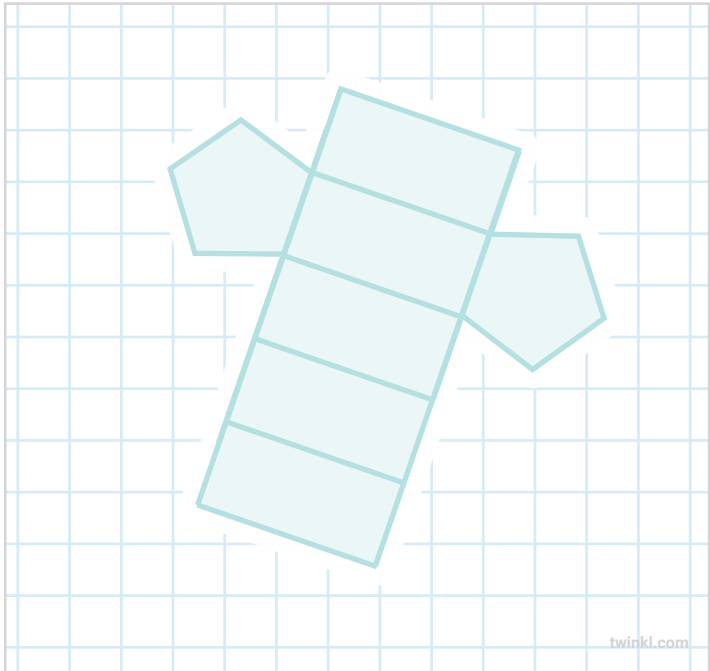

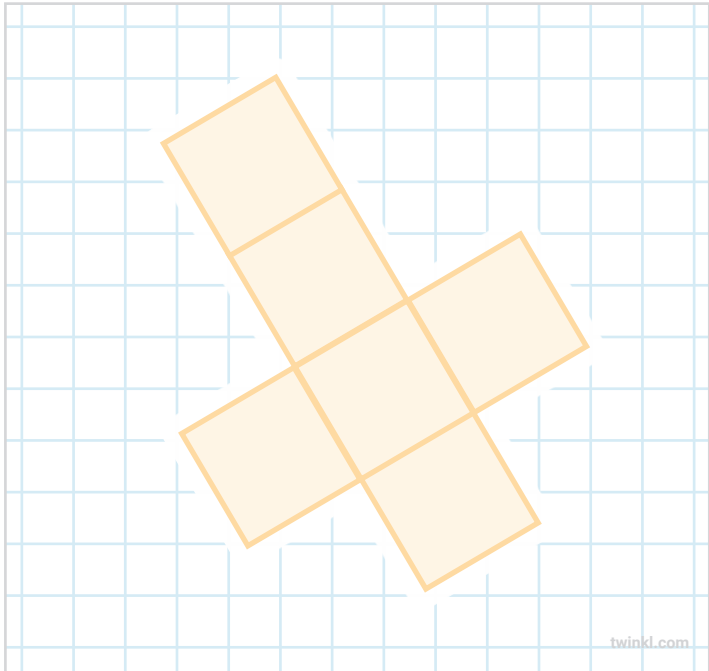

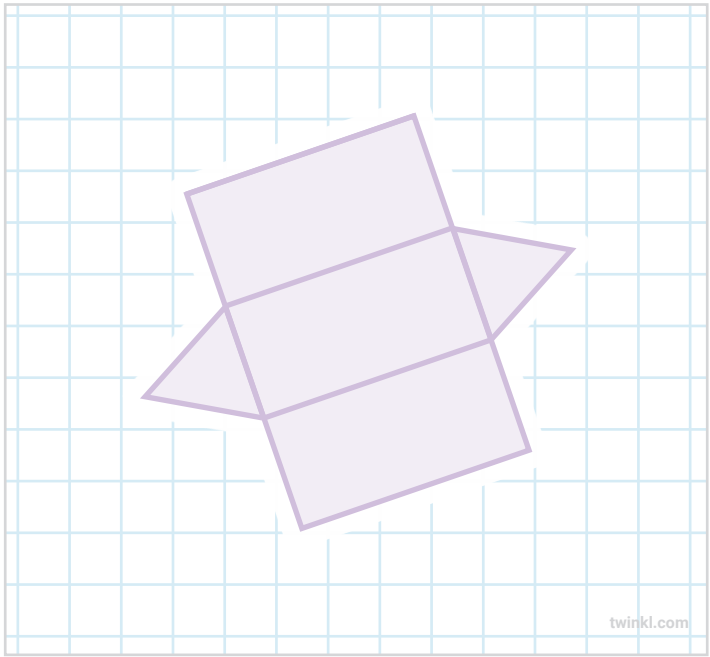

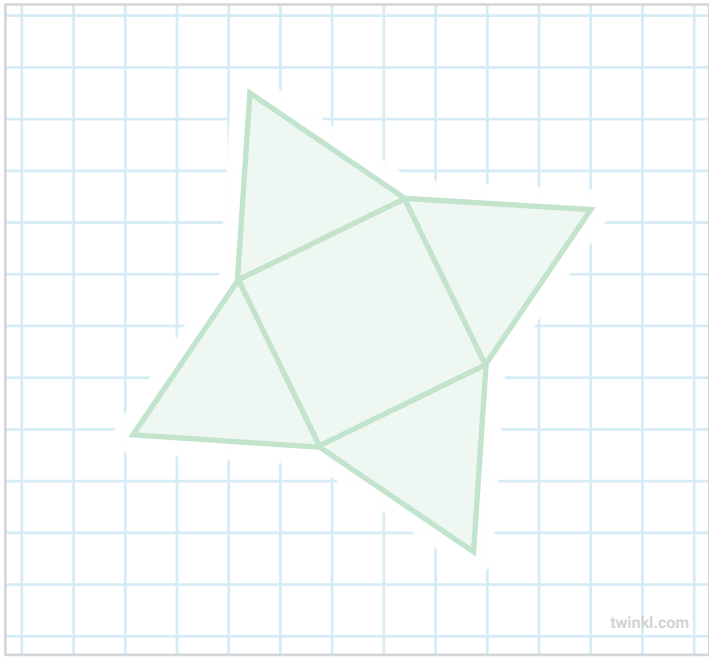

☐☐☐☐☐☐☐☐☐

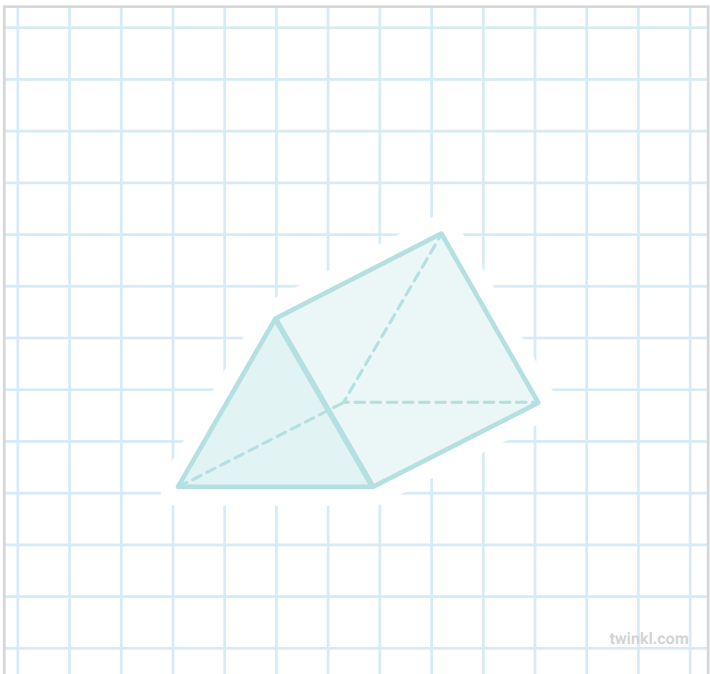

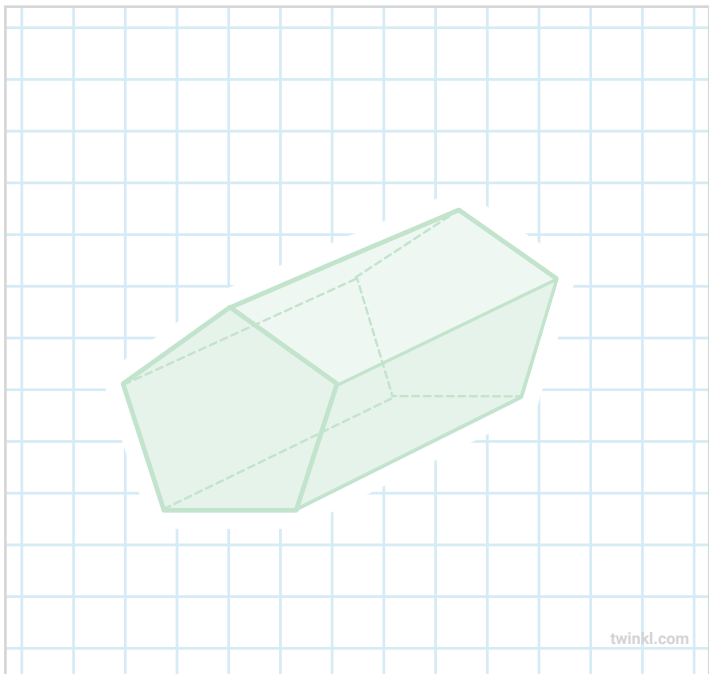

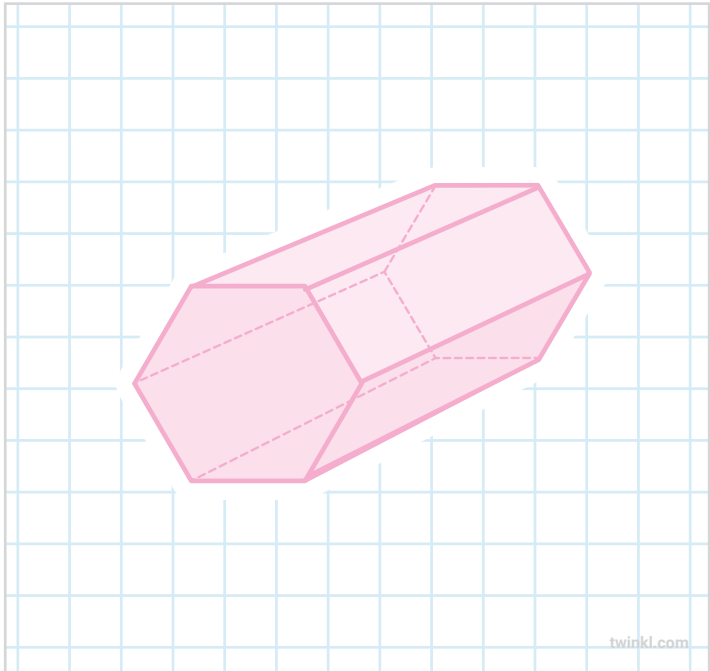

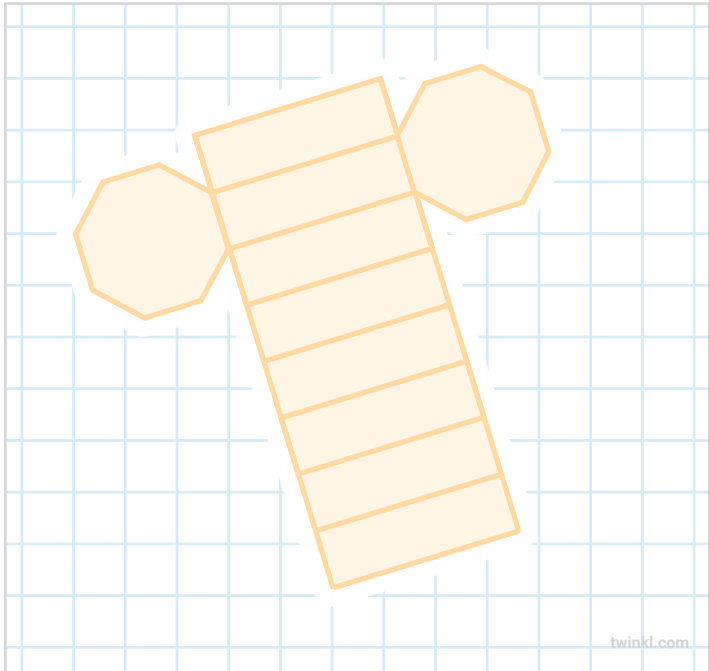

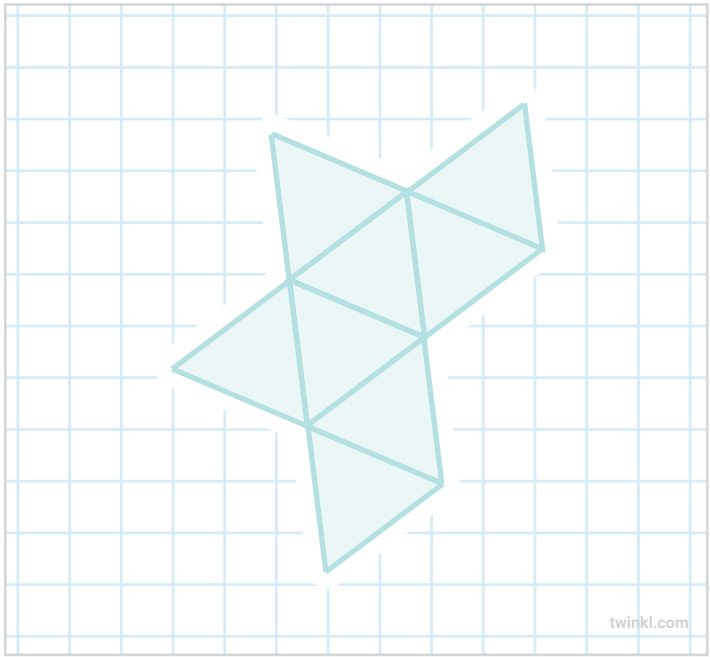

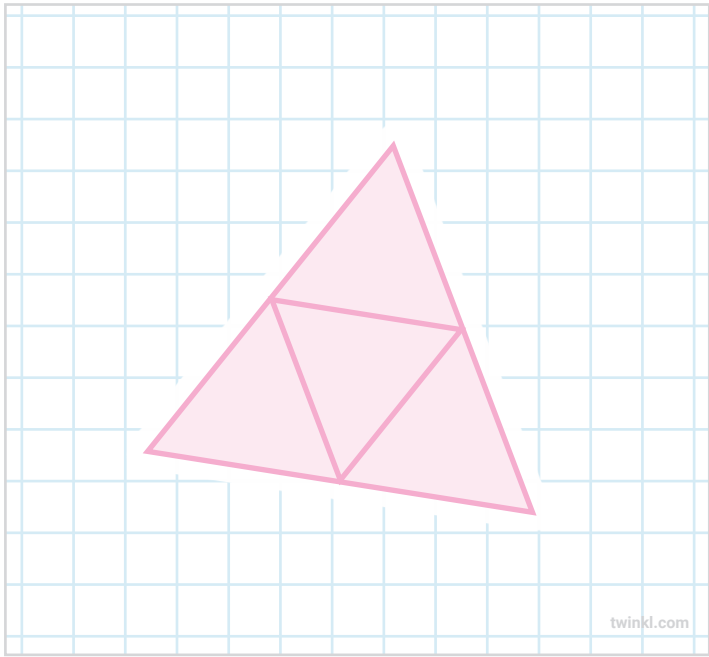

Match the Net to the 3D Shape

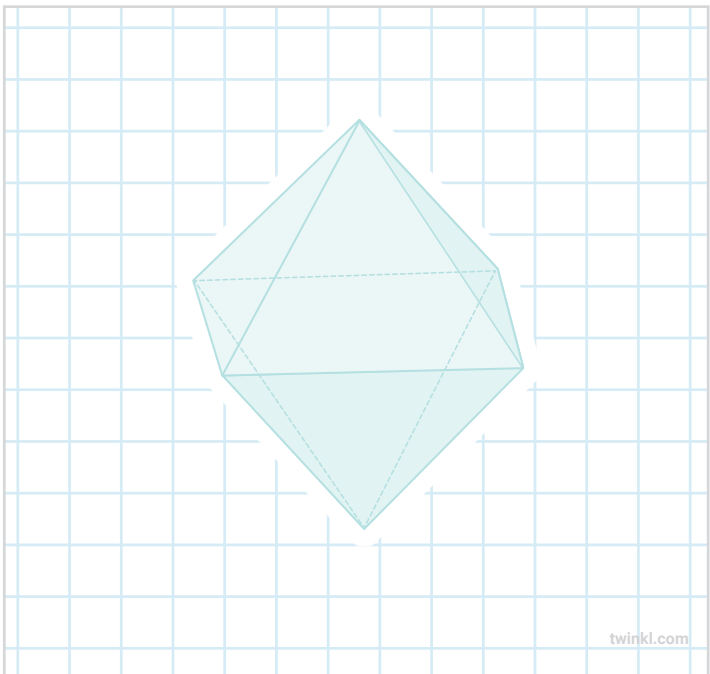

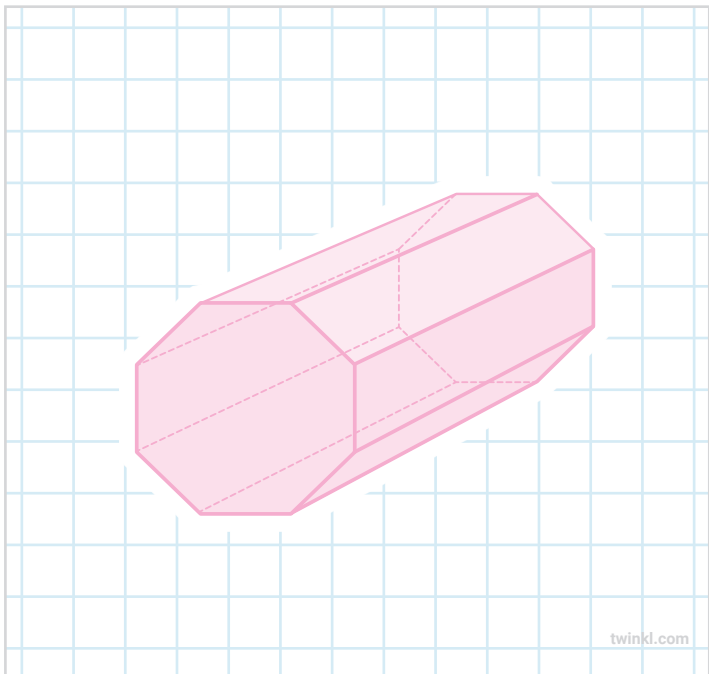

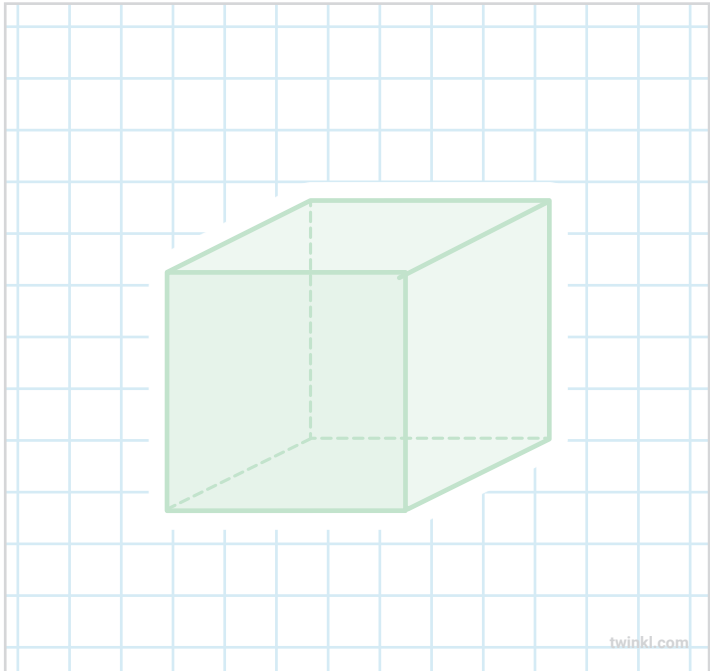

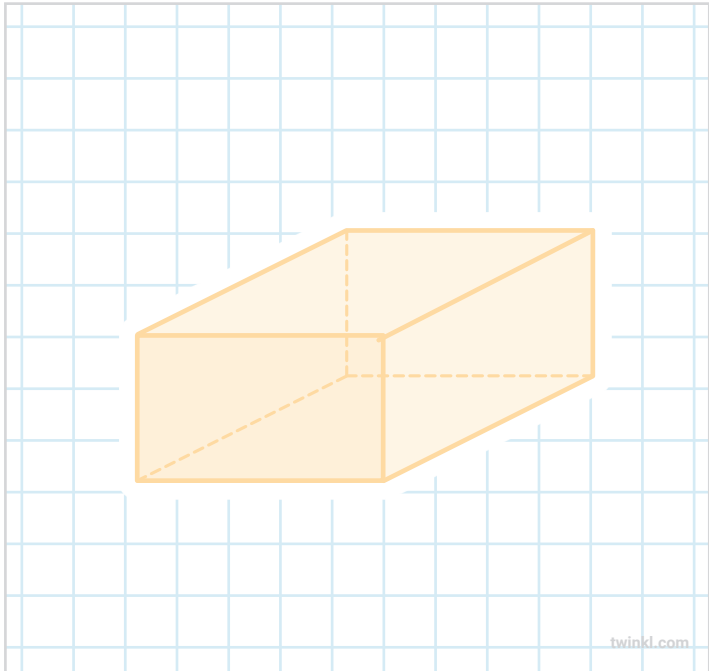

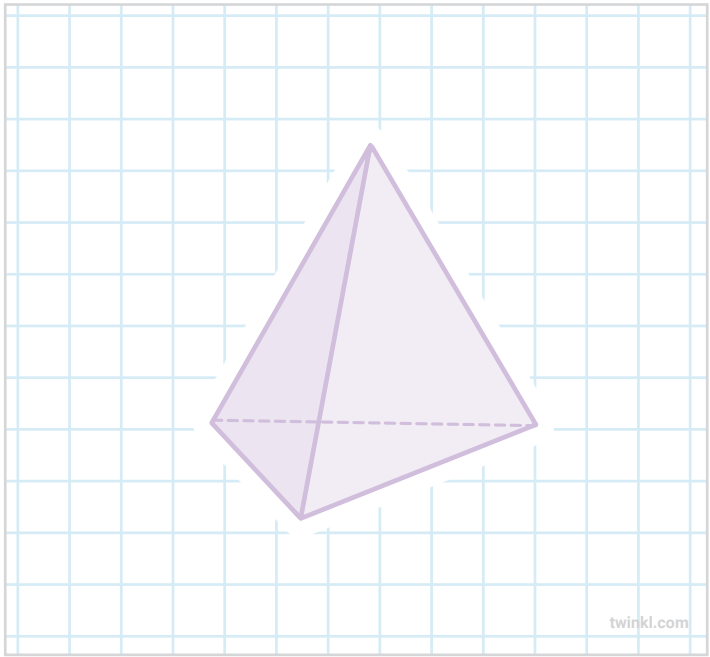

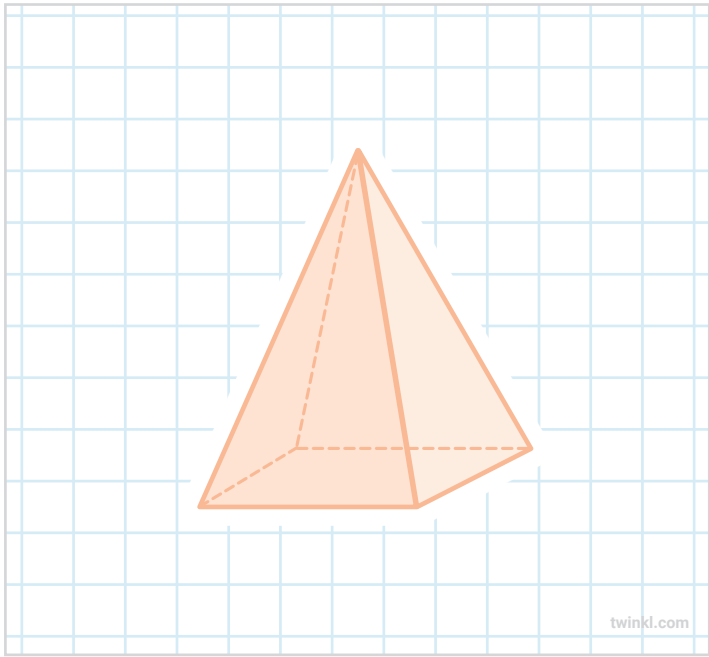

Print and cut out these cards, then shuffle them. You can use them in a couple of ways:

- Match the images of nets to the images of 3D shapes.
- Turn all the cards face down. Choose two to turn face up. If they match, keep them. If not, turn them back over. Keep going until you've matched them all.

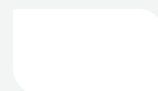

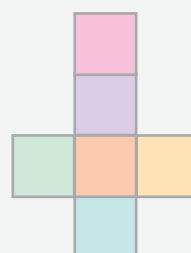

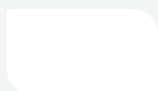

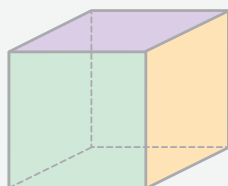

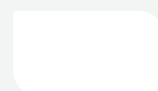

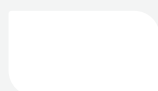

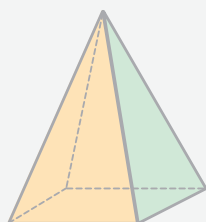

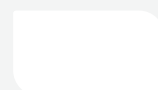

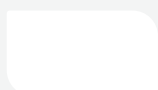

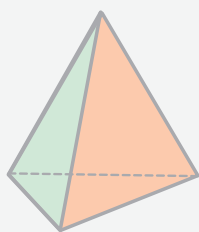

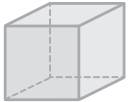

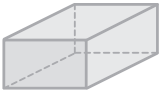

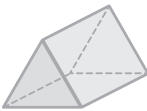

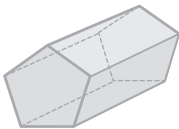

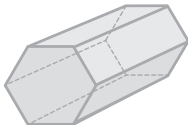

Answers

Which Net?

Properties of 3D Shapes – Answers

	Shape Name	Number of Faces	Types of Faces	Number of Edges	Number of Vertices
	cube	6	6 squares	12	8
	cuboid	6	6 rectangles	12	8
	tetrahedron	4	4 equilateral triangles	6	4
	square-based pyramid	5	1 square 4 equilateral triangles	8	5
	triangular prism	5	3 rectangles 2 triangles	9	6
	pentagonal prism	7	2 pentagons 5 rectangles	15	10
	hexagonal prism	8	2 hexagons 6 rectangles	18	12
