

Statistics: Read and Interpret Line Graphs

A Line Graph to Show the Average Daytime Temperature of a Town over 10 Days

Use the data in the graph to answer the questions.

1. What was the temperature on day 5?

2. What was the difference in temperature between day 2 and day 8?

3. Which day was warmest?

4. Between which 2 days did the average temperature rise the most?

5. How long did it take the average temperature to rise 9°C ?

Statistics: Read and Interpret Line Graphs

Answers

1. What was the temperature on day 5?

8.5°C

2. What was the difference in temperature between day 2 and day 8?

$11.5 - 5.5 = 6^{\circ}\text{C}$

3. Which day was warmest?

day 7

4. Between which 2 days did the average temperature rise the most?

between day 4 and day 5 (it rose by 3.5°C)

5. How long did it take the average temperature to rise 9°C?

4 days (it rose from 4°C on day 3 to 13°C on day 7)
