More children voted for football than tennis or rugby.

6) 14

Interpret Pie Charts **Answers**

1) half (answer can be written as a word or fraction)

2) $400 \div 2 = 200$

3) basketball = 50

netball = 50

swimming = 25

gymnastics = 25

tennis = 25

rugby = 25

4) Both children's statements are correct.

Felix's statement is correct because the total number of children who voted for basketball or netball is one-quarter.

$$\frac{1}{8} + \frac{1}{8} = \frac{2}{8} = \frac{1}{4}$$

Amrit's statement is correct because the total number of children who voted for swimming, gymnastics, tennis or rugby, is one-quarter.

$$\frac{1}{16} + \frac{1}{16} + \frac{1}{16} + \frac{1}{16} = \frac{4}{16} = \frac{1}{4}$$

Interpret Pie Charts **Answers**

1) Are these statements true or false?

	true	false
