

Calculating Angles

KS2 Maths Practice Reasoning

1

Calculate the missing angle marked with a letter in each of the following:

2

3

4

5

6

7

8

9

Calculate the missing angle marked with a letter in each of the following:

10

11

12

13

14

15

16

17

Calculate the angle in the following drawings:

BDA = 29°

BCD = 72°

18

Calculate the angle in the following drawings:

$$\angle ABC = 111^\circ$$

$$\angle BDC = 69^\circ$$

19

Calculate the angle in the following drawings:

$$T = 47^\circ$$

20

Calculate the angle in the following drawings:

$$U = 53^\circ$$

21

Calculate the angle in the following drawings:

$$U = 138^\circ$$

22

Calculate the angle in the following drawings:

$W = 141^\circ$

$X = 39^\circ$

23

In each of the following drawings mark the angles that are equal to the given angle. Follow the example below:

24

25

26

27

28
