

Pyramid Group Challenge 3

Instructions

Your task is to fill in both pyramids. One pyramid is to be filled with percentages and decimals and the other pyramid is to be filled with fractions in their simplest form.

Each pyramid is to be the equivalent of the other. For example, if there is a fraction of $\frac{3}{5}$, the corresponding box in the other pyramid will need to be filled with the equivalent decimal or percentage.

If there is a blank box in the percentages and decimals pyramid, it needs to be filled with a decimal. If there is a % sign in the box, it needs to be filled with a percentage. The first two rows of the pyramid have been filled in to show you.

				60%					
				0.2	0.25				
			15%	0.16	%				
			%	42%	0.08	14%			
		0.05	0.175	%	0.025		68%	%	
18.2%	%	14.2%	0.075		99.9%		%	%	0.021

				$\frac{3}{5}$					
				$\frac{1}{5}$	$\frac{2}{8}$				
					$\frac{10}{100}$	$\frac{3}{4}$			
		$\frac{8}{50}$	$\frac{9}{36}$				$\frac{39}{100}$		
	$\frac{1}{50}$			$\frac{36}{40}$		$\frac{57}{76}$		$\frac{25}{80}$	
	$\frac{18}{200}$			$\frac{25}{200}$		$\frac{18}{40}$	$\frac{19}{20}$	$\frac{14}{32}$
