Interpret Pie Charts

Children in both an infant and junior school were asked what their favourite game to play at school was. There are 60 children in the infant school and 120 children in the junior school. These pie charts show the results.

1) Are these statements true or false?

	true	false
The least popular game in the infant school is hide and seek.		
Half of the children in both the infant and junior schools chose benchball.		
The same number of children chose benchball in the infant school and the junior school.		
The number of children in the junior school who chose hide and seek is the same as the number of children in the infant school who chose heads down, thumbs up.		
30 children chose benchball in the junior school.		
15 children chose heads down, thumbs up in the infant school.		
90 children in total from the junior school chose hide and seek or benchball.		
The total number of children from both schools is 200.		
The total number of children who chose benchball across the infant and junior school is 90.
