

Parent Guide

@twinklparents

We're excited to share this activity with you. If you are interested in finding more engaging, fun and interesting activities for you and your children, then check out these links to different areas of the [Twinkl Parents](#) website.

games

crafts

puzzles

experiments

word searches

What is this resource and how do I use it?

Encourage your child to practise finding common multiples and identifying the lowest common multiple with these activities. They can start by colouring in the common multiples in the underwater scenes, then they can help the marine biologists work with their fishy data to find the lowest common multiples.

What skills does this practise?

Factors and Multiples

Lowest Common Multiple

Multiplication and Division

Further Activity Ideas and Suggestions

Multiples and factors are explored as part of your child's multiplication and division topic, which you can find out more about in [this category](#). Why not encourage your child to practise their times tables with these [multiplication wheels](#)?

Finding Common Multiples and the Lowest Common Multiple

1. Use your knowledge of multiples to answer these questions.

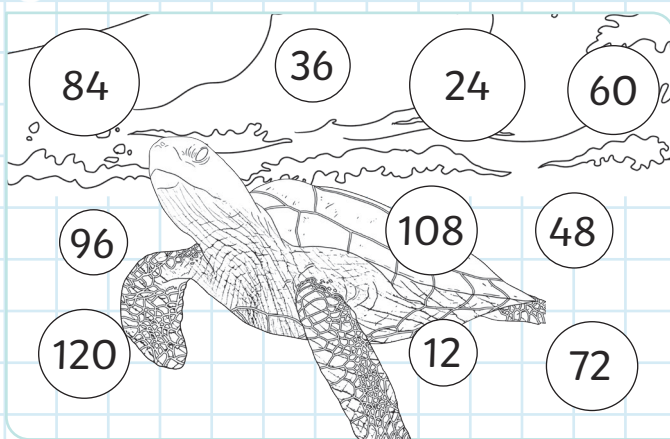

a) Colour the common multiples of 4 and 9.

b) Colour the common multiples of 2, 3 and 7.

c) Colour the common multiples of 6, 8 and 12.

2. A group of marine biologists have been studying species of fish; each type of fish is found living in a certain group size. These scientists have been investigating similarities between the group sizes, including the lowest common group number or lowest common multiple.

Example The orange striped fish is found in groups of 12, whereas the blue spotted fish is found in groups of 9. What would the lowest common group number be?

groups of 12 12, 24, 36

The lowest common multiple is 36.

groups of 9 9, 18, 27, 36

Can you use this same method to work out the lowest common multiples for the rest of the data?

a)

The pale pink fish is found in groups of 3, whereas the dark green fish is found in groups of 14. What would the lowest common group number be?

groups of 3

groups of 14

The lowest common multiple is _____.

b)

The yellow fin fish is found in groups of 3, whereas the grey eyed fish is found in groups of 11. What would the lowest common group number be?

groups of 3

groups of 11

The lowest common multiple is _____.

c)

The rainbow fish is found in groups of 7, the horned fish is found in groups of 4 and the shimmering fish is found in groups of 8. What would the lowest common group number be?

groups of 7

groups of 4

groups of 8

The lowest common multiple is _____.

d)

The pearly fish is found in groups of 12, the glowing fish is found in groups of 6 and the spotted fish is found in groups of 9. What would the lowest common group number be?

groups of 12

groups of 6

groups of 9

The lowest common multiple is _____.

3. The marine biologists have lost some of their data. Can you work out what is missing?

a)

They know that the lowest common multiple of two numbers is 72. If one number is 8, what might the other number be?

b)

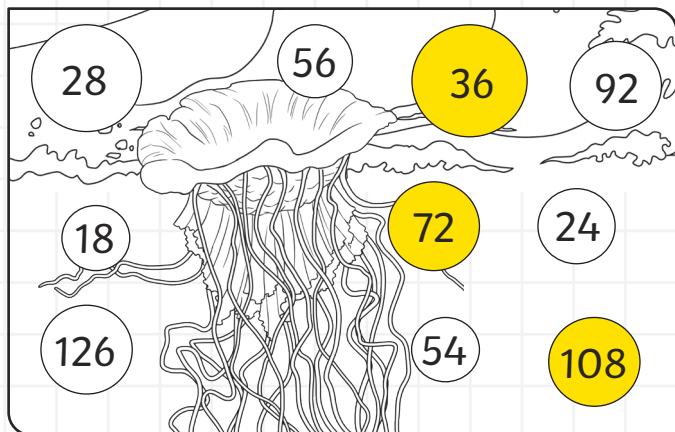

They know that the lowest common multiple of two numbers is 28. If one number is 7, what might the other number be?

c)

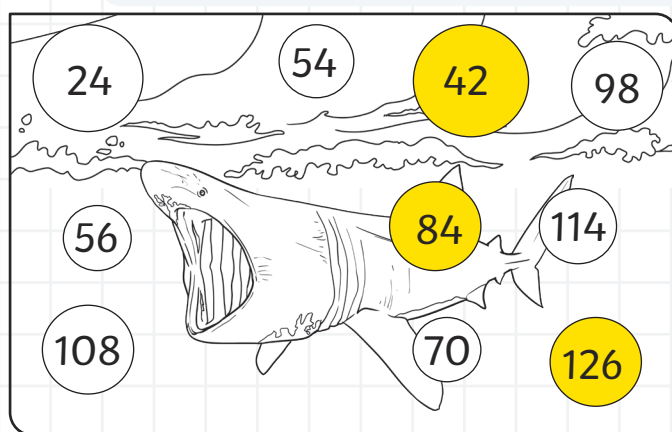

They know that the lowest common multiple of two numbers is 15. If one number is 3, what might the other number be?

Finding Common Multiples and the Lowest Common Multiple- Answers

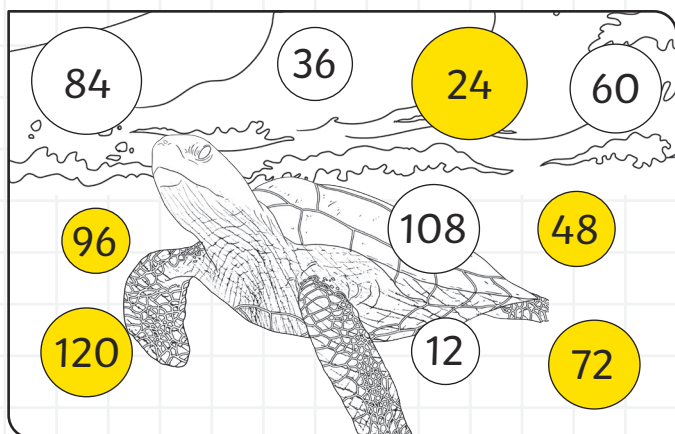

a) Colour the common multiples of 4 and 9.

b) Colour the common multiples of 2, 3 and 7.

c) Colour the common multiples of 6, 8 and 12.

a)

The pale pink fish is found in groups of 3, whereas the dark green fish is found in groups of 14. What would the lowest common group number be?

groups of 3 3, 6, 9, 12, 15, 18, 21, 24, 27, 30, 33, 36, 39, 42

groups of 14 14, 28, 42

The lowest common multiple is **42**.

b)

The yellow fin fish is found in groups of 3, whereas the grey eyed fish is found in groups of 11. What would the lowest common group number be?

groups of 3 3, 6, 9, 12, 15, 18, 21, 24, 27, 30, 33

groups of 11 11, 22, 33

The lowest common multiple is **33**.

c)

The rainbow fish is found in groups of 7, the horned fish is found in groups of 4 and the shimmering fish is found in groups of 8. What would the lowest common group number be?

groups of 7 7, 14, 21, 28, 35, 42, 49, 56

groups of 4 4, 8, 12, 16, 20, 24, 28, 32, 36, 40, 44, 48, 52, 56

groups of 8 8, 16, 24, 32, 40, 48, 56

The lowest common multiple is **56**.

d)

The pearly fish is found in groups of 12, the glowing fish is found in groups of 6 and the spotted fish is found in groups of 9. What would the lowest common group number be?

groups of 12 12, 24, 36, 48, 60, 72

groups of 6 6, 12, 18, 24, 30, 36, 42, 48, 54, 60, 66, 72

groups of 9 9, 18, 27, 36, 45, 54, 63, 72

The lowest common multiple is **72**.

a) They know that the lowest common multiple of two numbers is 72. If one number is 8, what might the other number be? **9, 18, 36 or 72**

b) They know that the lowest common multiple of two numbers is 28. If one number is 7, what might the other number be? **4 or 28**

c) They know that the lowest common multiple of two numbers is 15. If one number is 3, what might the other number be? **5 or 15**
