

Polynomial

The prefix 'poly' means many and 'nomial' means term. So a polynomial is an expression that can have an infinite number of terms. There are names for specific types of polynomials with 1, 2 or 3 terms.

$$4x^2 + 6x - 7y + 35$$

There are names for specific types of polynomials with 1, 2 or 3 terms.

Monomial

1 term

$$3xy^2$$

Binomial

2 terms

$$6x - 2$$

Trinomial

3 terms

$$xy^2 + 3x - 5y$$
