

Types of Graphs in Algebra

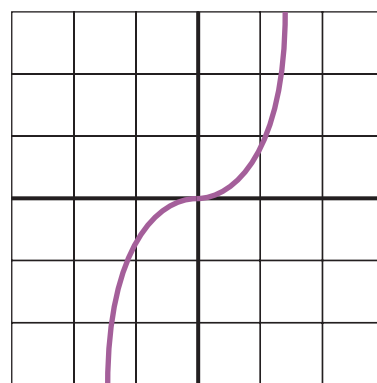

Algebraic equations can be represented as a graph. Whenever you see these frequently used terms, you should imagine that the graph of this equation will look similarly to the ones displayed below.

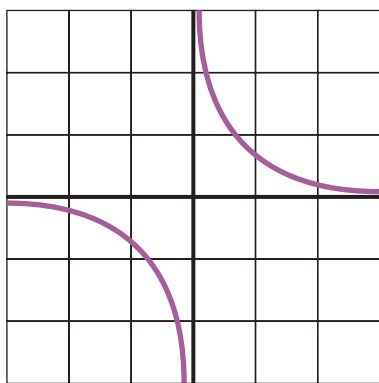

$$y = x$$

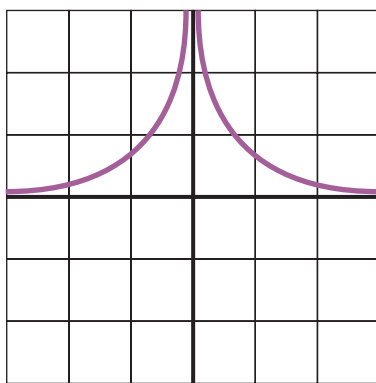

$$y = x^2$$

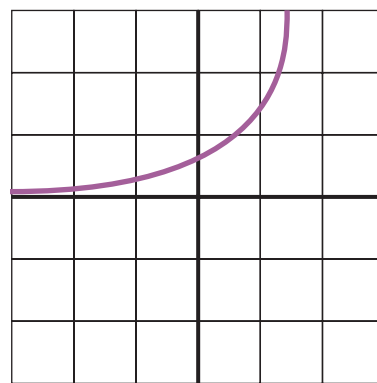

$$y = x^3$$

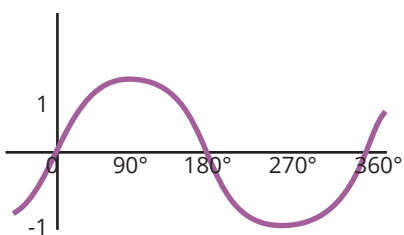

$$y = \frac{1}{x}$$

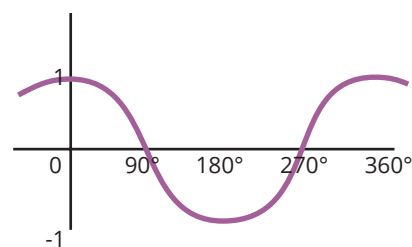

$$y = \frac{1}{x^2}$$

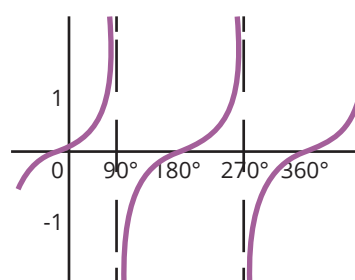

$$y = 2^x$$

$$y = \sin x$$

$$y = \cos x$$

$$y = \tan x$$
